Supporting Pathologists and Improving Health Equity
Our mission is to improve people’s health by:

- Developing tomorrow’s pathology leaders through awards for advanced training, research, and education.
- Mobilizing pathologists to expand health equity in medically underserved communities within the US and globally.

Our vision is to support all pathologists to be leaders in their communities and at the forefront of patient-centered care.
Supporting Pathologists and Improving Health Equity

The CAP Foundation—working with pathologist leaders, volunteers, supporters, and corporate partners—successfully expanded existing programs and developed timely new initiatives to address the issues facing pathologists and their patient communities in 2022.

As the CAP Foundation continued the fundraising momentum from the Empowering Our Future campaign, our focus in 2022 was on creating new partnerships, recruiting and orienting new board members, and ensuring the continued advancement of the specialty of pathology.

Thanks to our generous supporters we were able to establish new ways to support the development of new pathology leaders. Bharati Jhaveri, MD, FCAP, and Suketu Jhaveri, MD, established the Scientific Education and Research Fund to provide educational and leadership opportunities for early-career and established pathologists. The main objectives of the fund include support for impactful and sustainable cutting-edge scientific education and research initiatives. The fund provides early-career pathologists with the platform and opportunity to gain experience in scientific research and education that directly advances the specialty of pathology and pathologists.

As the CAP Foundation elevates its role in health equity, we are proud of the work being done through our Global Pathology Fund. Thanks to the support of Gerald R. Hanson, MD, FCAP, we have been able to expand our impact to pathologists and patients all over the world.

The Global Pathology Award provides funding to support sustainable global projects that develop and expand the delivery of pathology services in medically under resourced areas—three pathologists received funding for their projects in the first iteration of the award. In 2022, we also increased the number of Global Pathology Education Awards so that deserving pathologists have access to education during the CAP annual meeting.

We've continued to provide and expand essential grants and awards to help develop the next generation of pathologists. In fact, the Foundation awarded 74 grants and awards in 2022—the most in the organization’s history.

Our Medical Student Travel Award provided opportunities to those interested in a career in pathology by covering travel costs for educational events while also helping to increase the number of pathologists entering the specialty. Our Leadership Development Award and advanced training grants provide real-world experience and unique opportunities for pathologists to connect and engage with colleagues.

While 2022 was a transition year for our leadership, we welcome the chance to engage with new board members, volunteers, partners, and donors. We are excited about our future and grateful for the past year we have had together. Stay tuned for more on new initiatives and ideas for 2023 and beyond. In the meantime, learn more about all that we accomplished together in 2022. Thank you for your support and dedication to a healthier, more equitable future.

Eva M. Wojcik, MD, FCAP
President, CAP Foundation

Maya Ogden, JD
Executive Director, CAP Foundation

“Pathology is global and core to the practice of medicine regardless of where one resides. What I learn at CAP22 will support my long-term goal of bringing sub-Saharan pathology to the global stage.”

Robert Lukande, MBChB, MMed
Makerere University, College of Health Sciences
Uganda
Global Pathology Education Award
See, Test & Treat® Improves Health Equity in 2022

The CAP Foundation is off to a strong start for its second decade of See, Test & Treat. In 2022, the 11th year of the program served over 600 patients through 13 programs across the United States.

Partnering with 11 host health institutions and dozens of local organizations, See, Test & Treat provided essential cervical and breast cancer screening with same-day results as well as other health, social, and educational services.

Improving health equity in medically underserved communities is a key goal of the See, Test & Treat program, and the CAP Foundation is proud to help address a critical need for patient populations facing barriers to care. In 2022, 80% of patients had no health insurance and 30% had not received a routine physical in the last five years.

In addition to insurance, the CAP Foundation also considers at-risk populations who statistically face more barriers to care. Of the women screened in 2022, 40% identified as Latina while over 20% identified as Black and nearly 50% needed interpreters during their appointments. The CAP Foundation and its partner institutions help provide medical relief and peace of mind to diverse communities across the US.

See, Test & Treat programs provided 428 Pap tests and 409 mammograms throughout the course of the year. After the day of their programs, institutions continued to provide a significant amount of follow-up care.

Of the 409 patients who received mammograms 136 had abnormal readings and were referred for follow-up diagnostic mammograms and ultrasounds, which resulted in 12 biopsies. Two cases of breast cancer

“In the barriers to access that were involved—cost, apprehension, language, and childcare—are but a few of the barriers that all See, Test & Treat programs seek to alleviate.”

Mark Suhrland, MD, FCAP
have been identified thus far and patients continue to be monitored for further treatment. With these services, partner clinicians and their teams provided potentially lifesaving care to women across the US. Pathologists provided Pap tests to over 400 patients, many of whom were also tested for HPV that helps gauge a patient’s risk of developing cervical cancer or other serious illness. These tests resulted in follow-up care for 19 women including eight colposcopies—they will continue to receive treatment and surveillance through their new health care homes.

Pathologists partner with other specialty clinicians at their hospitals and organizations in their community to conduct a wide array of screening and education. Many host sites provided a combination of these essential health offerings including vaccinations for COVID-19, flu, and HPV in addition to screenings for everything from HIV to audiology issues. Nutritionists and other experts were also on hand at many events to provide education on proper diet, digestive health, and diabetes while serving a healthy meal to attendees.

The CAP Foundation continues to work with new and legacy host institutions to determine the appropriate needs for their patient communities. The Cleveland Clinic held its first See, Test & Treat program last year and look forward to their second program in 2023. The Foundation plans to help develop more legacy partners who have hosted multiple See, Test & Treat programs while also welcoming new host institutions and assisting them in their journey.

The pathologist leaders, volunteers, and staff at the CAP Foundation are constantly looking for the best ways to serve patients with the resources available: organizers welcome your input and look forward to hearing your stories. For more information on how you can support the See, Test & Treat program, visit foundation.cap.org and click “Get Involved” or “Ways to Donate.”

“Throughout my training, I have been able to access multiple resources that have helped me develop leadership skills, improve my diagnostic capabilities, and participate in research that is paving the way for advanced patient care within the field of digital pathology.”

Tarymé López Díaz, MD
University of Louisville
Informatics Award
2022 SEE, TEST & TREAT IMPACT AT A GLANCE

606 patients screened for cervical and breast cancer

155 patients with abnormal diagnoses required follow-up care

13 programs across the US

>750 volunteers

80 local organizations across the US

See, Test & Treat is a free, pathologist-led cancer screening and health education program that brings the power of diagnostic medicine to medically underserved populations.
344 patients provided feedback regarding their See, Test & Treat experience and how their knowledge and attitudes regarding key health habits changed because of their participation.

94% felt more comfortable going to the doctor

92% felt confident that they would go to the doctor for an annual exam

88% felt that they have a better understanding of how often they should get screened for cervical and breast cancer

93% said they learned why they should get a Pap test

90% said they learned why they should get a screening mammogram

89% felt confident that they know how and where to access medical services in the future
AWARDS AND GRANTS | Advancing the Science and the Profession

Gene and Jean Herbek Humanitarian Award
The Gene and Jean Herbek Humanitarian Award, introduced in 2011, is named in honor of the late Gene Herbek, MD, FCAP, a past president of the CAP who brought the first See, Test & Treat program to Native American women in South Dakota, as well as for his wife, Jean, who continues his commitment. The award honors a CAP member pathologist who has made innovative and unique contributions to advance the See, Test & Treat program.

Rebecca A. Osgood, MD, FCAP
Cambridge Health Alliance
Cambridge, MA

See, Test & Treat Outstanding Partner Award
The See, Test & Treat Outstanding Partner Award, established in 2019, compliments the Herbek Humanitarian Award by recognizing and honoring a non-pathologist partner for their contribution and service in support of the See, Test & Treat program.

Damali Campbell, MD
Rutgers–New Jersey Medical School/University Hospital Newark
Newark, NJ

Leadership Development Award
Among the CAP Foundation's most enduring programs, the Leadership Development Award introduces early-career pathologists to the specialty's issues and leadership opportunities by providing funding to CAP annual meetings, Residents Forum meetings, and the Pathologists Leadership Summit.

Yazan Alhalaseh, MD
Loyola University Medical Center
Maywood, IL

Medical Student Travel Award
The Medical Student Travel Award is intended to encourage and support medical students showing a strong interest in the specialty of pathology as a career choice by providing funding to attend CAP meetings where awardees will gain valuable insight and critical knowledge from experts regarding the field of pathology and its career pathways.

John H. Rippey Grant for Expedited Research
Continued in 2022, the CAP Foundation repositioned the John H. Rippey Grant for Expedited Research to help investigate and support laboratory issues related to COVID-19.

Saba Shafi, MD
The Ohio State University Wexner Medical Center, Columbus, OH

Yayuan Zhao, MD, PhD
University of Saskatchewan, Saskatchewan, Canada

Translational Diagnostics Advanced Training Grant Sponsored by Roche/Ventana
This grant offers CAP Junior Members hands-on exposure to ways in which novel histopathology-based diagnostic assays are developed.

Shuyu E, MD, PhD
University of Tennessee Health Science Center, Memphis, TN

Ruihe Lin, MD
Thomas Jefferson University, Philadelphia, PA

“Pathology is a discipline that is ever evolving and dynamic. Working in a non-academic setting in western Kenya, it can be a daunting task to keep current with changes in pathology. Having this opportunity will allow my skills and knowledge to improve leading to better serving my patients.”

Simon Onsongo Nyangena, MBChB, MMed, MSc.IHM
Aga Khan Hospital, Kisumu
Kenya
Global Pathology Education Award
Keitges Grant for Medical Ethics
This grant provides funding to support programs addressing medical ethics and/or health disparity issues as it relates to the practice of pathology and pathologists (e.g., the leadership role of pathologists in medical ethics, patient care, and patient advocacy).

Brian Jackson, MD, MS, FCAP
University of Utah
Salt Lake City, UT

Digital Pathology Observership Sponsored by AstraZeneca
The Digital Pathology Observership offers CAP Junior Members hands-on exposure—via a two-week program at AstraZeneca’s research facility—to the ways in which artificial intelligence solution platforms are being used to examine digital pathology images for specific tissue classes, features, and pathologies not easily quantified using traditional image analysis techniques.

Kristina Doytcheva, MD
University of Chicago Medical Center
Chicago, IL

David Nai, MD
University of Michigan Hospital and Health System
Ann Arbor, MI

Digital Pathology and Artificial Intelligence Advanced Training Grant Sponsored by PathAI
This grant offers CAP Junior Members exposure to digital pathology and artificial intelligence via a four-week training elective at PathAI. Trainees learn how machine learning based diagnostic tools are developed from early concepts to validation and development, concentrating on the role pathologists play in this process.

Justin Ren Yuan Chang, MD, MS
Virginia Commonwealth University Health System
Richmond, VA

Young Investigator HER2 Research Grant Sponsored by AstraZeneca and Daiichi Sankyo, Inc.
This award offers CAP members funding to support proposals leading to the development of a clinically implementable framework for monitoring and ensuring consistency in scoring HER2 expression levels, as clinical standards beyond current therapeutic thresholds may evolve.

Xiaoxian Li, MD, PhD, FCAP
Emory University
Atlanta, GA
SNAPSHOTS OF 2022 | A Historical Year of Support and Impact for the CAP Foundation
The CAP Foundation expresses its deepest gratitude to the following members, friends, staff, corporations, and foundations for the support they have generously given to the CAP Foundation in 2022 and throughout their lifetime.

**Is Your Name Missing?**

If you think your name should be included in the CAP Foundation Honor Roll of Donors, and it is not, there is probably a logical explanation: We made a mistake. Although we take great care in compiling our list of donors, there is always the possibility of error. If we omitted your name or if your name is incorrect, please accept our apology and notify us of the mistake. This honor roll of donors lists gifts received between January 1, 2022 – December 31, 2022. If you made a gift before or after those dates, your name will not be listed here. If you believe you made a gift, but you are not sure—we know it can be difficult to keep track of contributions—check your financial records or call our staff, and we will check ours. If you forgot to send in a contribution last year, consider making a gift now to ensure your name is included in the 2022 CAP Foundation Donor Honor Roll.

Questions? Please call the CAP Foundation at 800-323-4040 ext. 7079
Learn about volunteer opportunities, award and grant deadlines, and the See, Test & Treat program schedule by following @CAPFndn on Facebook, Instagram, Twitter, and LinkedIn and searching the hashtag #CAPFoundation and #SeeTestTreat.

“One of my major goals is to improve laboratory medicine practice in the sub-Saharan African region. This award will help with networking and collaboration opportunities in addition to motivating younger medics to embrace the practice of laboratory medicine.”

Bruno Basil, MBBS
Federal University of Health Sciences Otukpo
Nigeria
Global Pathology Education Award
Through proper, accessible screening and education, the CAP Foundation envisions a future in which no one dies from cervical cancer.
